

IMS

Introduction

Kieran Goodinson

The man, the myth, the legend himself

How I approached this:

Break down into chunks

Give myself a schedule to try and keep to

Consultant Journey

Things I learnt for this project

- JAVA
- GIT
- Maven
- Jira
- MySQL

Version control

- <https://github.com/Kieran0507/IMS-Starter>

Testing

- 70.9% coverage with a total of 84 tests
- Tested every method I could find a way to test
-

Conclusion

This project was a learning experience. There's few QOL changes I would like to make given more time e.g. better error messages. I would like more practice with writing supporting documentation for future projects
But I believe things went quite well and this has raised my confidence in what I'm capable of

Demonstration

Sprint review

- <https://frasersmith.atlassian.net/jira/software/projects/IS/boards/6>
- 80% coverage left behind

Sprint retrospective

Went Well

- Time management
- Coding
- Testing

Things to improve on

- Documentation
- Version management
- Jira board
